## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Casapulla U.S. Patent Application 203/0071185. Casapulla shows all of the claimed subject matter of an assembly in Figures 1-7.

Regarding claim 1, an assembly for connecting a connection member 12 and an extension tube 16, the connection member connected to a bicycle rack 50 and the extension tube 16 connected to a vehicle 20, wherein the connection member 12 has a through hole and a polygonal wall extending from a side of the connection member and enclosing the through hole, the extension tube inserted through the through hole, the polygonal wall having at least one hole defined there through and the extension tube having at least one threaded hole 30, a bolt 36 extending through the at least one hole and engaged with the at least one threaded hole.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kahlstorf U.S. Patent 2002/0008364 and Anderson et al. U.S. Patent 2003/0102343 show similar inventions.
